

NBV501G - Assignment4 - Team 2

Project Status

We finished the project!

- It's hosted on <https://hbv501g-team-2.onrender.com/>
 - takes a while to load
- Our public github : [GitHub - monsterblonster/HBV501G---Team-2: Hugbúnaðarverkefni 1 - Team 2](#)
- Our Final slides : [Hugbó1-Kynning - Google-skyggnur](#)

Some notes on the finished product

- still have some bugs, notably with inviting users that don't exist and using icelandic characters.
- the images were saved locally, this works perfectly when running locally but after we hosted the website it became apparent that you can only see images that you loaded.

Progress

- Everybody contributed well in this assignment, all assigned tasks were completed
 - Group Calendar
 - Rescheduel event
 - a bunch of UI improvements, notably the event page.
 - User status was added (GOING, MAYBE GOING, NOT GOING) for each event
 - a bunch of activity log connections were added

Final thoughts

- takk fyrir áfangann! :)))
