# 1 Project Status

As of phase 4 the project is still mostly on schedule. The points for phase 4 are mainly revolving around the Groups with a bit of emphasis on the User, Activity log and the Calendar. as stated before, the points in this phase and the previous phase could have been mixed better.

# 2 Progress

The tasks this phase were, as previously stated, mostly related to the same end point. Therefore, when dividing the assignments it was possible to have some of the team members focus on other points to make later phases a bit more accessible and offering help to other members when needed. All in all progression looks to be on schedule.

# 3 Exceptions

There were some minor issues with the initial implementation of tags when making a group, and some additional stuff with profile pictures. These issues are not major and are easily solved before the end of the project and should have no effect on the project timeline or final product.

# 4 Final Thoughts

The team has been good at communicating, working together and discussing the project even with other obligations making demands of our time. The team members are ready and receptive to the task division and assist each other when necessary.
